San Bernardino Police Department Achieves Higher Operational Efficiencies With Next Generation InTime Scheduling Engine

BURNABY, BC, CANADA , October 5, 2006 – The San Bernardino Police Department, which provides law enforcement services to over 200,000 residents in Southern California has successfully implemented InTime’s Enterprise Scheduling Solution to manage the scheduling and deployment of over 350 sworn officers.

According to Michael Eckley, San Bernardino Police Department’s Public Safety Systems Manager, “We have had a very positive experience working with InTime in the past. They understand our operational needs and that is reflected in their product. InTime delivered a product that has exceeded our expectations and worked with us to deliver it according to our schedule. The support has been fantastic as well. ”

For San Bernardino Police Department, the upgrade from InTime’s earlier version has not only provided enhanced functionality such as easier schedule building, but the underlying system architecture allows for easy integration with other systems.

“We are pleased to receive continuing validation that our next generation product clearly meets the needs of our customers,” commented Harry Dollard, InTime’s President. “We look forward to building our relationship with San Bernardino.”

About San Bernardino Police Department

The San Bernardino Police Department, in its present form, was founded on May 15, 1905. Nine original officers provided law enforcement services to the citizens of San Bernardino. Today, over 350 sworn officers and about 150 civilian support personnel provide a wide variety of law enforcement services to a community of more than 200,000 people.
