Ventura Police Department Enhances Automation with Next Generation InTime

Big Improvements in Emergency Responsiveness Expected

BURNABY, BC, CANADA, July 9, 2007 – The Ventura Police Department, which provides law enforcement services to over 100,000 residents in Southern California, has gone live with InTime’s Enterprise Scheduling Solution to manage the scheduling and deployment of over 170 employees.

For the Ventura Police Department, InTime’s Enterprise Scheduling Solution replaced an earlier generation of InTime’s software used for scheduling both sworn and non-sworn staff. In addition to significant technology and automation enhancements, InTime will provide a tightly integrated Notifications module that will allow for automated emergency call outs to staff by telephone.

“In keeping with our commitment to continue to be one of the most modern and progressive agencies in California, we selected InTime for its best in class technology and superior flexibility,” commented Mathew Moore, Systems Specialist at Ventura Police Department.

“My dispatchers and the evening watch corporal, who handles the roster, are all very happy. Thanks to all for making this happen,” added Lieutenant Gerard Thurston, Watch Commander, Ventura Police Department.

About Ventura Police Department

The Ventura Police Department is currently comprised of 179 employees, of which 128 are sworn officers. The agency uses the most advanced equipment available, coupled with an ambitious training program for all employees. The Ventura Police Department is committed to the protection of life and property by providing the highest quality service through community involvement and problem solving. For more information visit the Department website at: <http://www.ci.ventura.ca.us/depts/police/index.asp>.

About InTime Solutions Inc.

Founded in 1996, InTime Solutions is a scheduling product leader in the public safety marketplace. We develop software and service solutions to more efficiently manage the allocation and deployment of your workforce. Our clients rely on us to improve utilization of personnel and to integrate the associated information with other systems within their organization.
